INTERNATIONAL SEARCH REPORT

International application No.

PCT/US02/09179

Box III TEXT OF THE ABSTRACT (Continuation of Item 5 of the first sheet)

The technical features mentioned in the abstract do not include a reference sign between parentheses (PCT Rule 8.1(d)).

NEW ABSTRACT
The invention is directed to a system (10) for remote monitoring of a space and equipment. The system has network appliances (16), a server (14), and a client (12). The server (14) receives data from a network appliance (16). The server (14) may then deliver an application and data to the client (12) for viewing and manipulation the data. The client (12) may display the datas as a mapping, displaying isons associated with the network appliance (16). The client (12) may manipulate the organization of the data, the configuration settings of the network appliances (16) and store map and graph configurations.
